## 1. Landing page

The landing page is both **exercise selection** and **Training Log**. Here, students select the desired exercise set and have an insight into their work status.

### 1.1. Exercise selection

Each learning module in the LOGO series focuses on an important topic of pre-school learning. The start page of the learning module is both an exercise selection and a Training Log. A learning module in the LOGO series always offers nine different exercises on the topic of the learning module. Click or tap on the triangular exercise symbol to select the difficulty level of an exercise. The exercises become more challenging from top left to bottom right.

The learning modules in the LOGO series are **language-free**.

### 1.2. Training Log

The exercise selection is also a Training Log and continuously documents the learning progress. The three sides of the triangular exercise symbol represent the three difficulty levels of an exercise. They are filled with color according to the degree of completion of an exercise. Anyone who completes all three difficulty levels of an exercise without errors is rewarded with a star.

## 2. Levels of difficulty of an exercise

The three difficulty levels of an exercise help children to familiarize themselves with a topic. In the introductory level, they get to know the mechanism and the requirements of the exercise in the simplest possible way. Success is guaranteed. This motivates them to tackle and master the increasing challenges of the next levels.

The next level is unlocked as soon as the previous level has been solved completely and without errors.

### Level 1 – Introductory exercise with tutorial character

Simple and with graphic support where useful  
Getting to know the task, the objects and the exercise mechanism  
Few tasks  
→ Preparation for levels 2 and 3

### Level 2

Increased requirements in terms of differentiation and orientation  
Often shuffling the selection, reorientation in every task  
More tasks, more elements to choose from

### Level 3

High demands in terms of differentiation and orientation  
Mixing the selection, reorientation in each task High number of tasks, many elements to choose from  
→ Increased demand on stamina and concentration

## 3. Exercises

### 3.1. Info bar

#### Navigation arrow

The blue arrow takes you back to the level selection and from there to the exercise selection.

#### Icon Level

The three increasing dots represent the three difficulty levels. The filled dot indicates the currently selected level (here level 2).

#### Exercise processing status

The progress bar fills up according to the degree of completion of an exercise. Incorrectly completed exercises are marked with a **x**.

#### Help

Click or tap on the question mark to activate help. An animation shows what needs to be done in the current task. Help can be called up at any time.

profax

### 3.2. Task and selection

The exercise screen is usually divided into two areas.

The exercise tasks appear in the left-hand (or upper) area. These can be elements to be searched for, objects that need to be added, objects moving in certain directions, etc.

The right (or lower) area offers a selection of solutions, a comparison picture, symbols matching movements, etc.

### 3.3. Feedback

Correctly solved tasks get a green checkmark ✓. An animation often confirms the correct selection.

Incorrectly solved tasks are marked with a red cross in the selection ✗. The error appears as an ✗ on the progress bar.

### 3.4. Types of exercises

#### 3.4.1. Click exercise

Only **one element** is searched for. Click or tap on the element to select it. The feedback as to whether the selection was correct or incorrect is provided immediately.

profax

### 3.4.4. Drag

An element is clicked or tapped on and must be moved to a destination by holding down the mouse button. The path becomes visible when dragging.

Variant: A path is drawn by holding down the mouse button or directly with the finger on a touch-enabled screen.

### 3.4.6. Memory

Pairs of cards that belong together must be uncovered. Once all pairs have been found, the exercise is completed.

The list of exercise types will be continuously updated as the LOGO series is expanded.
