## 1. Landing page

The landing page is both **exercise selection** and **Training Log**. Here, students select the desired exercise set, determine the work mode and have an insight into their work status.

### 1.1. Rotate drum

tempo60 offers **100 exercise sets** with **24 exercises** each for training basic operations. Click on the **arrow buttons** to rotate the drum to the desired exercise set. The set in the middle of the drum is active at the start of the exercise.

### 1.2. Information on the training set

The following properties are displayed in the exercise set:

- Set number
- Special feature
- Example / type of task
- Feedback
- Number of tasks in the set

 Especially difficult tasks

- ✎ key calculations
- 📊 Series (multiplication)

Some sets contain several types of task (e.g.  $x + y = \square$  und  $x + \square = y$ ). You can find a more detailed overview in → [The tempo60 exercise sets](#).

### 1.3. Quick selection of a operation

Clicking on an **operation symbol** directly selects the sets with the selected operation. Several symbols are active for mixed sets.

### 1.4. Two operating modes

Click on the **60 button** to switch between training mode and test mode.

#### 1.4.1. Training mode

In training mode, students solve the 24 tasks in a set **without a time limit**. The tasks are provided randomly from a larger pool of tasks and shuffled each time the set is started.

#### 1.4.2. Test mode

In test mode, students work **against the clock**. They try to solve the 24 tasks in the set in 60 seconds if possible. The order of the tasks always remains the same.

**profax Verlag AG**  
 Bahnstrasse 28  
 9435 Heerbrugg

 info@profax.ch  
 www.profax.ch

profax

### 1.5. Random set

By clicking on the **random button**, the computer assigns the student a randomly selected set in the activated work mode.

## 2. Working with a tempo60 exercise set

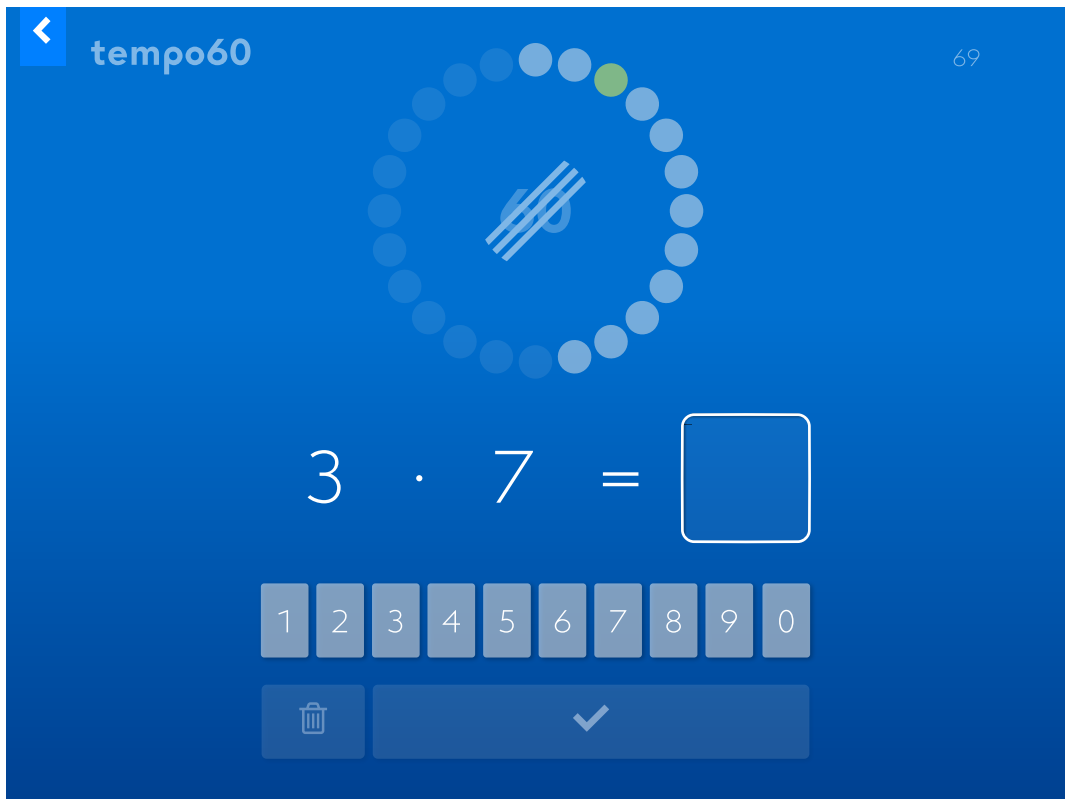

Clicking on the **start button** starts the countdown for the selected exercise set.

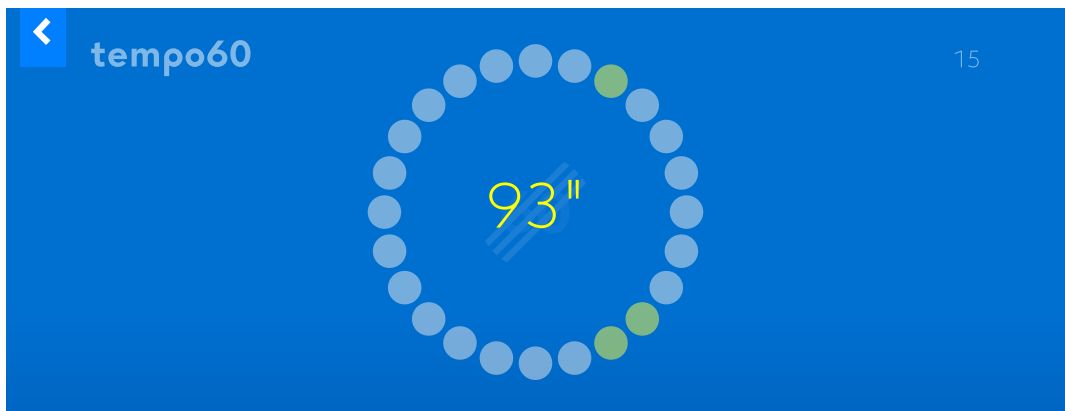

The countdown starts and the exercise begins at zero.

### 2.1. Working in training mode

The 24 dots in the circle represent the 24 tasks in the set. The results are entered using the keyboard or by tapping on the numbers on the screen. The entry is confirmed with **ENTER** or by clicking on the ✓ button on the screen. The entry can be corrected by clicking on 🗑️.

The feedback shows how much time in seconds was needed to solve the 24 tasks. Yellow dots represent results that had to be corrected.

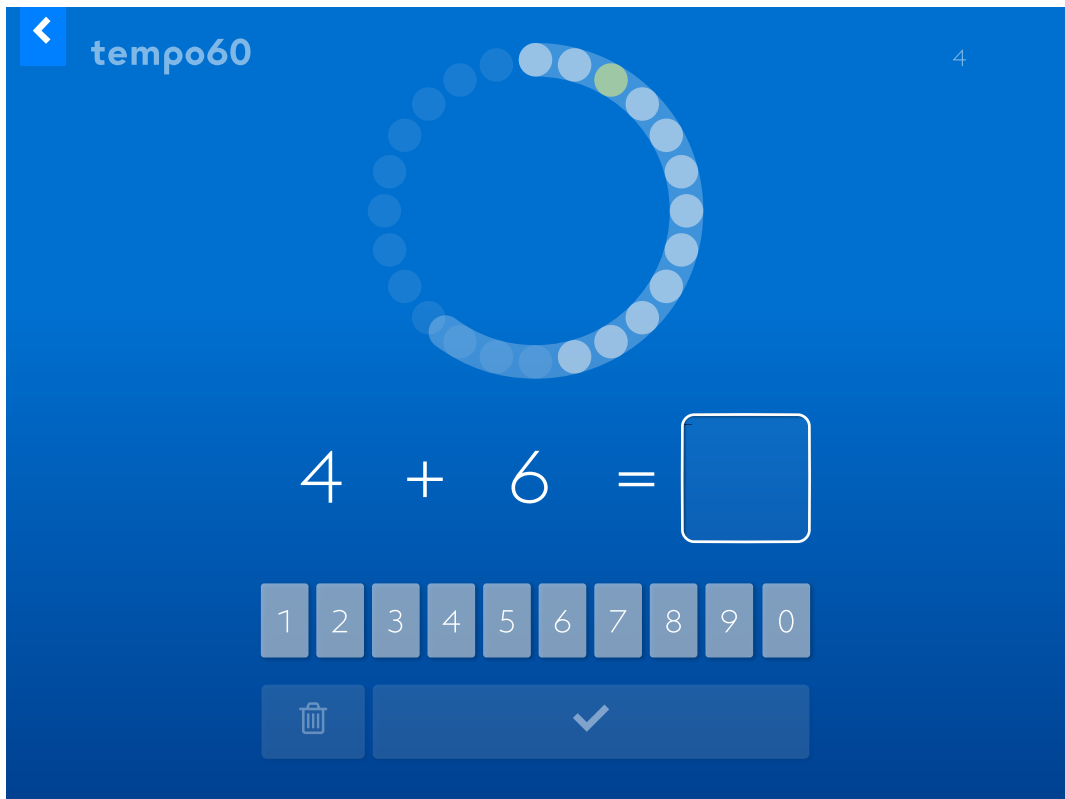

The training mode symbol appears on the roller.

If the result was achieved in less than 60 seconds, the time required is also displayed.

If the student starts the set again, the best previous training time is displayed.

## 2.2. Working in test mode

The 24 dots in the circle represent the 24 tasks in the set. Behind the task dots, the running time is visible as a filling arc. Students can see at any time whether they can keep up with the running clock.

#### Test with a time over 60 seconds

White dots stand for correctly solved tasks, yellow dots for incorrectly solved and corrected tasks.

If there is no better test result, the number of tasks that were solved within 60 seconds is displayed on the start page.

#### Test with a time under 60 seconds

**profax Verlag AG**  
 Bahnstrasse 28  
 9435 Heerbrugg  
 Schweiz  
 +41 44 500 60 10  
 info@profax.ch  
 www.profax.ch

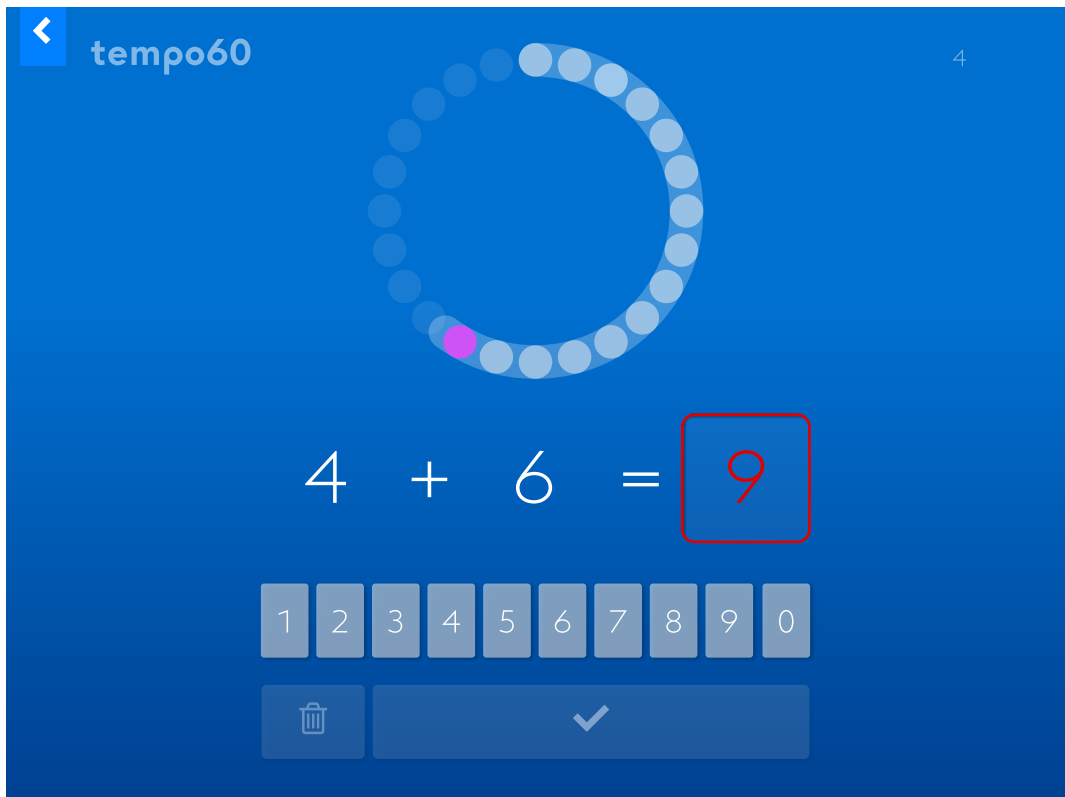

The exercise evaluation shows how much time was needed to solve the 24 tasks. If you manage to solve the 24 tasks within 60 seconds, you are rewarded with a star.

The best test time to date is displayed on the start page in the edited set. The star also appears on the drum. The best result is retained.

### 2.3. Behavior of tempo60 in the event of errors

Incorrectly entered results are displayed in red. A purple dot appears on the clock and the task must be solved again. The dot turns yellow as soon as the task has been solved correctly.

### 3. Work plan / Progress profaxonline

The **Progress** area allows the teacher to accompany students on their individual learning path.

Teachers only see students from groups to which they themselves belong. To do this, the administrator must assign the responsible teacher to the corresponding groups. A teacher can be responsible for several groups.

In the gray column on the left, click on **Progress**.

Select a person.

All learning modules assigned to the person are displayed in the *Progress* column. Show or hide all exercises of a learning module by clicking on the title of the learning module.

In tempo60, one line is displayed for each exercise for the training (e as in *exercise*) and one for the test.

If you activate the checkbox for **only worked exercises**, only the exercises in which the student is currently working or whose training has been completed are displayed.

profax Verlag AG

Bahnstrasse 28  
9435 Heerbrugg  
Schweiz  
+41 44 500 60 10  
info@profax.ch  
www.profax.ch

### 3.1. View learning progress

Exercise 1 – Level 1				
Exercise 1 – Level 2				
Exercise 7 – Level 1				

For exercises with individual tasks, the learning status is displayed with a colored field for each task.

Birds: Exercise 1A				
Technology: Exercise 1A				
Rhythm: Exercise2B				

For exercises with a flashcard, the learning status is displayed as a progress bar.

They mean:

- green** Answer correct
- red** Answer incorrect
- orange** the task is currently under revision
- gray** not worked on it

### 3.2. Reset the exercise

Exercises can be reset by clicking on

### 3.3. Work plan

By clicking on , exercises can be added to or removed from the work plan of the selected student, by clicking on of the selected group. If an exercise is in the work plan, the name of the training module and the progress indicator are highlighted in yellow. If the line is green, the training work is complete.

### 3.4. 7 Days Stats and Timeline

If you work with a *weekly plan*, you will receive feedback on how long you have worked with the individual learning modules in the last seven days under **7 Days Stats**.

The **Timeline** shows when which exercises have been completed in the last 30 days. The **red** and **green** numbers indicate how many tasks were solved correctly or incorrectly.

The following parameters are recorded:

- if a child works before 07.00, no time is displayed and all tasks of the same exercise are combined;
- if a child works after 07.00, the time is displayed and all tasks of the same exercise are combined if they are done within an hour;
- if a child works after 5 p.m., no time is displayed and all tasks of the same exercise are combined;
- if a child works past midnight, the entry is spread over both days; the time shown starts when the first task is solved;
- if the child is inactive, the time is not counted.
