Exercise selection via favorites. The exercises are sorted by competence. Save the exercises that you use frequently here.

Exercise for color discrimination. Based on tests to determine color vision deficiency.

A speech bubble appears in the preview. Find all speech bubbles in the same room position.

Practicing eye-hand-eye coordination with graphomotoric shapes. On touchscreens also directly with the finger.

dob offers in six modules a broad range of exercises, covering easy stimulations, generally basic tasks as well as the training of cognitive skills. With the help of **dob**, learners are specifically stimulated and supported in the following areas:

- Focus, recognize and name, compare and distinguish objects
- Fix, track, show and name moving objects
- Find and assign objects according to specific criteria
- Move objects in a targeted and precise manner

The pool of objects contains around a thousand objects such as simple geometric shapes, gridded objects, visual symbols, emoticons, pictograms, cubes, numbers, upper and lower case letters, clocks, traffic signs, flags and figurative illustrations on everyday topics.

Using keyboard commands or gestures on a touchscreen, object properties and the background can be changed while working and thus adapted directly to the individual needs of the learner.

dob pro also offers a wide range of options for individual support planning:

- Create your own new exercises with the integrated editor
- Targeted grouping of exercises into lessons
- Save and organize preferred exercises as favourites
- Exchange exercises using the export and import function

dob is suitable for supporting and observing all children aged 2 to 6 years and people with developmental delays, visual impairments and multiple disabilities in educational institutions and at home. The use of **dob** is also useful in psychomotor skills, occupational therapy and rehabilitation.

dob is available in three versions:

dob

Basic version for learners containing a set of 10 fixed exercises, covering the most important visual skills. Additionally there is an import area for 10 more exercises where you are able to import more exercises from **dob pro** - the full version for teachers and therapists.

dob plus

Extended version for learners. Contains the complete set of more than 2500 exercises available in **dob pro**.
