The landing page of **tempo60 10'000**. By turning the roller, learners select one of the 100 sets and start the exercise in training or test mode.

Fast, accurate mental arithmetic!

tempo60 10'000 supplements and extends the existing **tempo60 Basic arithmetic**.

With **tempo60 10'000**, learners develop mathematical skills building on the basic skills in the number range up to 10,000. The training of basic operations is deepened in the extended number range and supplemented by the topics of *doubling* and *halving*, *squares* and *division with remainder*. The aim is to solve each of the 100 sets of 12, 16, 20 or 24 problems without errors in a maximum of 60 seconds.

Completing to whole hundreds or thousands. Training in basic operations in the extended number range.

Two modes of working

The **training mode** allows you to improve your proficiency in the selected training exercise without time pressure. The 24 problems are mixed at random.

In the **test mode**, you try to solve all 24 problems in one exercise in 60 seconds. The order of the questions remains the same.

Multiplication tables with whole tens, hundreds and thousands.

ew exercise type: doubling and halving numbers up to 10,000
